$s_{DE} = T_r/M_v$ is $|w_0|$, an equation-of-state number. It does not live on this axis.
$\Omega_{DE,SSEE} = 1 - \Omega_m$ vs observational constraints
$\Omega_{DE,SSEE} = 1 - \Omega_m = 0.6911$
$s_{DE} = |w_0| = 0.8399$ — not a density
